Location Number: NY 065

Location: Wellington  
Coordinates: 37°35' / 116°47'  
Elevation: 5600'  
Map Sources: USGS Cactus Spring Quadrangle; Clason 1906  
References: Paher; Ball; Site Investigation 9/3/77  
Photographs: None Available  
Status: Potential National Register Site

Wellington is northeast of Gold Crater on a west-facing slope of the southern extension of the Cactus Range.

The mine was one of several that were active briefly in 1904. (See Gold Crater for historical setting.) A single vertical mine shaft marks the site today. No standing structures remain.
