

$\pm 6300'$ , Upper Adit

QUAILEY MINE  
Mineral County, Nevada  
PRELIMINARY GEOLOGY AND ASSAYS  
SURFACE

Note: This map was made using a brunton compass. Many areas may be incorrectly located because of magnetic anomalies (not known at the time of the mapping) caused by the presence of now known, and probably unknown, bodies of magnetite.

#?? samples by Forbes

- Granitic
  - Meta-sediments and volcanics
  - hornfels
  - limestone
  - garnet
  - magnetite
  - mineralization as-copper, scheelite, Au, Ag, e
