OTHER NAMES: This could be Commanche Mine

MINERAL COMMODITY(IES): Ag, Pb, Cu

TYPE OF DEPOSIT: Replacement along shears

ACCESSIBILITY: Up Rocco Canyon on east side

OWNERSHIP: ?

PRODUCTION: ?

HISTORY: ?

344 Item 42

County: White Pine

Mining District: White Pine

AMS Sheet: Ely

Quad Sheet: Green Springs 15'

Sec. 23, T 16N, R 57E
SE/4

Coordinate (UTM):

North 4 3 4 3 5 0 0 m

East 0 6 2 7 9 2 5 m

Zone +11

DEVELOPMENT: A series of (maybe 6) openings all of which trend N50°E. Some are open, some caved. Judging from the dumps there should be several hundred feet of workings.

ACTIVITY AT TIME OF EXAMINATION:

GEOLOGY: Surface - med.-gray limestone, appears bleached & highly fractured .

1) Dump material - ore is a gossanous - jasperoidal material with cu oxidized visible.

REMARKS: Slide #9 1) Two pictures on camera looking NE at North end of workings.

Slide #10 on camera looking E at south end of workings. Standing on dump. More workings in back of cabin.

2) Sample # 927.
