5290 0049

PROPERTY NAME: Un-named workings

OTHER NAMES: _____

MINERAL COMMODITY(IES): Ag

TYPE OF DEPOSIT: _____

ACCESSIBILITY: Down Cathedral Canyon from townsite of Hamilton

OWNERSHIP: ?

PRODUCTION: ? Unknown

HISTORY: ?

County: White Pine

Mining District: White Pine

AMS Sheet: Ely

Quad Sheet: Treasure Hill 15'

Sec. 29 , T 16N , R 58E SE/4

Coordinate (UTM):
North 4 3 4 2 1 5 0 m
East 0 6 3 2 4 5 0 m
Zone 11

DEVELOPMENT: Caved adit (Location shown on topo map) And small open-pit in old mine dump. Probably muled down to leach pods in Hamilton.

ACTIVITY AT TIME OF EXAMINATION: None.

GEOLOGY: Surface geology above adit & also material lying on dump is a medium-light grey limestone. There is a minor oxidized zone located above mouth of adit which runs up-hill from it. Assume adit follow this zone(?) A dark gray on fresh surface to buff colored on weathered surface, shale composed the east side of dump.

REMARKS: From size of dump adit must go in several hundred feet. Fair portion of dump has b[   ] been mined & probably been leached in Hamilton.
#22 1) Picture on camera - Looking West-NW across mined dump area & into caved adit.
#23 2) Picture on camera - Looking NW into open-cut which was mined for dump materia[l]
3) No sample collected.
