PROPERTY NAME: Becky Claims?	344) Item 58
PROPERTY NAME:	County: White Pine
OTHER NAMES:	Mining District: White Pine
MINERAL COMMODITY(IES): Pb?, Hg?	AMS Sheet: Ely
TYPE OF DEPOSIT: Veins(?) along shear	Quad Sheet: Pancake Summit
THE OF DEFOOTS.	11 16N 57
ACCESSIBILITY:	Sec, T, R
OWNERSHIP: Becky Claims, located Oct. 29, 1963 by E. M. Dowd &	Coordinate (UTM):
G.L. Dorrety (location monument found on road to Dog	Coordinate (UTM):  North 4   3   4   7   9   15   0 m
XXXXXXXXX Star Mine)	East 0   6   2   6   7   15   0 m
HISTORY:	Zone +11
DEVELOPMENT: 3 or 4 open adits near & behind small cabin above r	oad. Abandoned, caved
house at head of gully. Several small dumps & caved ad	its between & around cabin
& house.	- STATE OF S
ACTIVITY AT TIME OF EXAMINATION: None.	
GEOLOGY: Behind small cabin and adit explores a limestone-do	lomite at portal. The brecc
contains grey calcite veined limestone/dolomite fragmen	ts cemented by crystalling
calcite. A deep purple breccia composed of quartzite f	ranments gemented by fire
red silica is also present on the dump & in small cuts	on rideograph
Just below ridgerest are several small sut-	on riagecrest.
Just below ridgcrest are several small cuts which e	xpose an altered & oxidized
marked by gouge & Feox the limestone is exposed here is silicified veinlets.	silicified & cut by numerou
A resistant spine of silicified limestone/dolomite	preccia forms the ridgecrest
The spine strike N30-40 E and is cut by a number of ver	tical fractures.
The host rock for this deposit is probably the Hansen	Creek Dolomite.
