RECOMENDATION: Prospect for Westerly Continuation to see if Vein can be drifted in on from Zadow Canyon.

Strong Continuous Mineral vein. Assay off Dump: .02 Au Oz 6.94 Ag Oz 5.58 Pb %

MORM 1 4 5 120 E SINCE MIS WORK THE FLAT THRUST FAULT LAS BEEN discould Ep. WORK Should PROSPECT 1- 70 WEW FORMATION 2- TO HORIZON DI= FLAT - UNDER This AREN ThRUST

POST MINERAL 0 POST MINERAL Ó 230  $\mathcal{V}_{\mathcal{O}}$ 

Strong Mineralized
Outcropping E, C, and P veins were obviously target of Early Prospectors around 1900. However it appears these veins are cut by POST mineral Fault

#1. Therefor this Excellent Target can be prospected for by drifting North-Westerly from Shaft.
