PRODUCTION: Minor

HISTORY: _____

County: HumboldtMining District: WinnemuccaAMS Sheet: WinnemuccaQuad Sheet: Winnemucca West 7 1/2'c NE/4
Sec. 23, T 36N, R 37E

Coordinate (UTM):

North 4 5 3 7 1 0 0 mEast 0 4 3 4 5 7 5 mZone 11DEVELOPMENT: Numerous shallow workings. Some more recent bulldozer roads for drill holes.ACTIVITY AT TIME OF EXAMINATION: None.

GEOLOGY: A N30W, 55NE mineralized shear at the contact between granodiorite and tan
argillite of the Triassic Auld Lang Syne Group contains white quartz at one locality and
iron-stained crustiform calcite at another. Open-space textures are present in the vein
matter, and a yellow-green to green, secondary mineral coats fractures in gossan and vein
matter. Possibly this mineral is an arsenate. All vein matter was observed on dumps. The
granodiorite is somewhat argillized, and the argillite is bleached. The mineralized zone
has some areas of near-surface stoping up to 3m wide.

REMARKS: Sample 2357 is of select quartz vein matter from an ore pile. Sample 2358 is
select gossan, calcite vein matter and sparse vein quartz from the dumps of two adits (caved)
in a canyon.
